MHT-CET MBA/MMS

READING COMPREHENSION — MASTER SUMMARY

Hinglish Concept Guide • Strategy • Question Types • Elimination • Timed Practice

Goal of RC
Reading Comprehension mein sirf passage padhna enough nahi hai. Main idea, details, inference, tone, purpose, vocabulary-in-context aur author ka viewpoint identify karna hai — aur answer ko passage ke evidence se support karna hai.

1. Reading Comprehension kya hota hai?

RC mein ek passage diya hota hai aur uske basis par questions pooche jaate hain. Questions directly stated facts, implied ideas, central theme, author's attitude, word meaning in context, reference words aur logical conclusions par ho sakte hain.

Golden Rule
Passage evidence > outside knowledge. Apni general knowledge ya personal opinion ko passage ke answer mein add mat karo.

2. Passage ko kaise read karein?

Step 1 — Structure samjho

- Paragraph 1: topic, background ya issue identify karo.
- Middle: explanation, evidence, comparison, problem/cause ya argument track karo.
- Final: conclusion, implication, recommendation ya final viewpoint dekho.

Step 2 — Paragraph labels

Har paragraph ka mentally short label banao, jaise Problem → Cause → Evidence → Counterpoint → Conclusion. Isse long passage ka structure yaad rehta hai.

Step 3 — Signal words

- Contrast: however, but, although, whereas, yet, nevertheless
- Cause/result: because, since, therefore, hence, thus
- Example: for example, for instance, such as
- Addition: moreover, furthermore, in addition
- Conclusion: therefore, hence, in conclusion

3. Main Idea / Central Idea

Main idea = poore passage ka central message. Yeh sirf topic nahi hota. 'Technology' topic hai; technology ke effect par author ka central claim main idea ho sakta hai.

- Too narrow: sirf ek detail/example.
- Too broad: passage se bahar ka general statement.
- Extreme: always, never, completely, only — jab passage itna strong na ho.
- Half true: option passage ke ek part ko cover karta hai, whole passage ko nahi.

Main Idea Test
Kya option passage ke maximum paragraphs ko explain karta hai? Agar haan, aur unsupported/extreme claim nahi hai, to woh strong candidate hai.

4. Fact / Detail Questions

Specific fact, example, number, reason ya statement ke questions mein memory se guess mat karo. Question ke unique keywords locate karo aur surrounding context se verify karo.

- Keyword ya synonym scan karo.
- Relevant lines read karo, sirf matching word nahi.
- Option mein extra information add hui hai ya nahi check karo.
- Question exactly kya pooch raha hai, usi scope mein answer do.

5. Inference Questions

Inference directly same words mein nahi diya hota, lekin passage ke evidence se logically follow hota hai.

> Inference Formula
> Inference = Evidence + Logic.
> Inference imagination nahi hai. Option passage se reasonably supported hona chahiye.

- Outside knowledge based option reject karo.
- Passage se stronger claim reject karo.
- Emotionally attractive but unsupported option reject karo.
- Ek chhoti detail ko poore passage par apply mat karo.

6. Author's Purpose

Author passage kyun likh raha hai? Common purposes:

- Inform — facts/details provide karna.
- Explain — concept, process ya reason clarify karna.
- Compare — similarities/differences discuss karna.
- Criticize — weakness/problem highlight karna.
- Persuade/Argue — reader ko position accept karne ki direction dena.
- Suggest — solution/recommendation dena.

7. Tone of the Author

Tone = author ka attitude. Sirf positive/negative feeling se decide mat karo; word choice, evidence aur argument ka style dekho.

Tone	Meaning / signal
Objective / Neutral	Factual, balanced, emotionally controlled
Critical	Weaknesses/problems highlight karna
Optimistic	Positive possibility/future par focus
Pessimistic	Negative outcome/limitations par focus
Skeptical	Claims par doubt/question
Appreciative	Praise/positive evaluation
Concerned	Problem/risk ko serious attention
Cautious	Qualified/limited claims; overstatement avoid

8. Vocabulary in Context

Question pooch sakta hai: 'The word X most nearly means...' Yahan dictionary ka first meaning automatically choose mat karo. Sentence aur surrounding context dekho.

- Word ko sentence mein option se replace karke dekho.
- Positive/negative sense check karo.
- Part of speech/grammar check karo.
- Contrast, example ya explanation nearby ho to use karo.
- Jo meaning sentence ka sense preserve kare, wahi choose karo.

9. Reference Questions

'this', 'they', 'it', 'such', 'former', 'latter' kis idea/person ko refer karte hain? Grammatical aur logical match dono check karo.

- Singular/plural agreement.
- Contextual meaning.
- Nearest noun ko blindly select mat karo.

10. Best Title Questions

Best title = central theme + correct scope. Na too specific, na unnecessarily broad.

- Entire passage cover kare.
- Author ke focus se match kare.
- Unsupported interesting idea na ho.
- Sirf ek example/detail ko title na bana de.

11. Compare / Contrast

Do ideas, methods, systems ya viewpoints compare hon to comparison ka exact basis track karo.

- A aur B ka difference kya hai?
- Common feature kya hai?
- Comparison kis basis par ho raha hai?
- Option comparison ki direction reverse to nahi karta?

12. Cause–Effect

Memory Rule
Cause → Effect
Cause = reason/trigger. Effect = result/consequence. Sirf do events saath hone se causation automatically prove nahi hoti.

13. Elimination Technique

RC mein 4 wrong options identify karna often easier hota hai than immediately finding the perfect answer.

- Outside passage: evidence nahi.
- Extreme: always/never/only/entirely type overstatement.
- Half true: ek part correct, complete question ka answer nahi.
- Reversed: cause-effect, comparison ya viewpoint reverse.
- Distorted: original idea ko unnecessarily stronger/weaker bana diya.

14. Question Type → Best Approach

Question Type	Approach
Main Idea	Whole passage ka common message
Specific Detail	Keyword locate → surrounding lines verify
Inference	Evidence + logic
Tone	Author ke words + argument style
Purpose	Author ka 'why'
Word Meaning	Context mein substitute karke check
Reference	Grammatical + logical match
Title	Central theme + correct scope

15. Speed Strategy

Timed preparation mein target sirf fast reading nahi, accurate reading + controlled decision-making hona chahiye.

- Word-by-word memorisation mat karo.
- Paragraph role identify karo.
- Question ka exact demand mark karo.
- Direct-detail questions ko locate-and-answer method se solve karo.
- Difficult inference/tone question par excessive time mat lagao.
- Elimination use karo, random guessing nahi.

Practice Progression
Pehle accuracy build karo. Accuracy stable hone ke baad timed sets, longer passages aur higher difficulty gradually add karo.

16. Common RC Mistakes

- Passage padhe bina options se guess karna.
- Outside knowledge ko passage evidence se upar rakhna.
- Extreme options ko automatically correct samajhna.
- Author ki opinion aur mentioned person's opinion confuse karna.
- One-line detail ko main idea samajhna.
- Inference ko imagination bana dena.
- NOT / EXCEPT / INCORRECT miss karna.
- Reference word ka wrong antecedent choose karna.
- Ek difficult word ki wajah se unnecessary full reread karna.

17. RC Attempt Checklist

1. NOT / EXCEPT / INCORRECT check kiya? ☐
2. Question exactly kya pooch raha hai identify kiya? ☐
3. Relevant paragraph/idea locate kiya? ☐
4. Answer passage evidence se supported hai? ☐
5. Option mein extra/extreme information to nahi? ☐
6. Inference mein outside assumption to nahi? ☐
7. Tone/purpose author ka hai, mera nahi? ☐
8. Final answer se pehle options compare kiye? ☐

18. 60-Second Revision Sheet

Remember these 10 rules
1. Main idea = whole passage.
2. Detail = locate + verify.
3. Inference = evidence + logic.
4. Tone = author's attitude.
5. Purpose = why author wrote it.
6. Vocabulary = meaning in context.
7. Reference = grammatical + logical match.
8. Title = central theme + correct scope.
9. Eliminate unsupported/extreme/reversed options.
10. Passage evidence > outside knowledge.

19. How to Review an RC Test

Sirf score note karna enough nahi hai. Har wrong/doubtful question ka error type record karo.

- Wrong answer → question type + why wrong.

- Correct by guess → evidence locate karke confirm karo.
- Slow question → kis step mein time gaya identify karo.
- Vocabulary doubt → contextual meaning note karo.
- Repeated error → next practice mein same question type target karo.

20. Final RC Mindset

Final Memory Line
Read for structure → Search for evidence → Infer only what is justified → Eliminate what the passage does not support.

Note: Yeh preparation summary hai. Iska focus passage-based reasoning, question recognition, elimination aur timed practice skills build karna hai.
