MHT-CET MBA/MMS Vocabulary - Summary + Extended Analogies

TASK 1 - Learning Pack | Hinglish explanations | Based on the supplied vocabulary syllabus headings

Use this first: This PDF is for understanding and revising Vocabulary before testing. The actual question paper/mock can be kept English-only later; here the explanations are intentionally Hinglish so the concepts become easier to remember.

1. What You Need to Cover

Your supplied syllabus image lists these 10 vocabulary areas: List of Words; Words Confused & Misused; Phobias; Manias; Prefixes & Suffixes; Analogies; Synonyms; Antonyms; One Word Substitution; Idioms/Phrases. The image gives the section headings and page ranges, but it does not show the full word lists. So the examples below are a structured exam-prep learning set built around those headings, not a claim that every example appears verbatim on those pages.

Q. Common Analogy Traps

• Near-synonyms vs exact synonyms: If the first pair is about synonym, the second pair should also be synonym, not a general association.

• Part-whole confusion: Wheel:Car is not the same as Driver:Car. Driver is a person associated with the car, not a physical part.

• Workplace confusion: Doctor:Hospital is profession:workplace. Doctor:Stethoscope is profession:tool. Identify which relation is present.

• Cause-effect vs object-function: Rain:Flood is cause-effect; Knife:Cut is object-function.

• Direction matters: Puppy:Dog is young:adult. Reversing it would be Dog:Puppy. Do not reverse the relationship.

• Specificity matters: If a question says Artist:Painting, do not automatically choose a broad word like Art; look for the matching creator:creation relationship.

• Use sentence testing: Convert A:B into a sentence such as 'A is related to B because ____'. Then apply exactly the same sentence frame to C:answer.

12. How She Should Study This Without Getting Overwhelmed

Round 1 - Understand: Read the meaning and one example aloud.

Round 2 - Recall: Cover the meaning and try to say it from the word/root.

Round 3 - Contrast: For confused pairs and antonyms, say the difference in one sentence.

Round 4 - Use: Make one fresh sentence of your own.

Round 5 - Test: Only after the above, move to MCQs. Wrong answers become revision words.

5-minute daily vocabulary revision loop

1 minute: 10 old words -> 2 minutes: 5 confusing pairs -> 1 minute: 5 analogy relationships -> 1 minute: recall without looking.

13. Final Memory Checklist

Area	Remember this
List of Words	Meaning + synonym + antonym + context
Confused Words	Difference + one sentence for each word
Phobias	Root + thing feared
Manias	Root + obsession/preoccupation
Prefixes	Prefix meaning changes the base word
Suffixes	Suffix can change meaning or grammatical category
Analogies	Find exact relationship first
Synonyms	Choose closest contextual meaning
Antonyms	Check the exact opposite, not merely a different word
One Word Substitution	Learn the definition and the word together
Idioms	Use the contextual/figurative meaning, not literal meaning

Task 1 complete: Start with this learning pack and mark difficult words. No 100-question test is included in this task so that learning comes first. The next task can be prepared separately when you ask.
