MHT-CET MBA/MMS

READING COMPREHENSION — MOCK TEST 1

100 Questions • 10 Passages • English-Only Test

Total Questions	100
Suggested Time	75 minutes
Format	MCQ — 5 options
Negative Marking	None in the official 2026 CET format

Instructions

Attempt all questions. Choose the single best answer. Read each passage before its questions. Base answers on the passage; use inference only when it is supported by the text. Do not check the answer key until the test is complete.

Technology and Attention

Digital technology makes information easy to access, but access does not guarantee deep understanding. Constantly shifting attention can lead to superficial processing. Digital tools are not inherently harmful: when used deliberately, they can support learning through note-taking, source comparison, and returning to difficult sections. The important distinction is between using technology as a tool and allowing it to control the rhythm of attention. Better digital habits therefore require control over how and when technology is used.

1. The central idea is that:

A. technology should be rejected

B. access guarantees understanding

C. deliberate technology use matters more than access alone

D. online learning is impossible

E. headlines are sufficient

2. Repeated interruptions may cause:

A. deeper analysis

B. superficial processing

C. better memory

D. greater concentration

E. faster comprehension

3. The author’s attitude is:

A. completely negative

B. uncritically positive

C. balanced

D. fearful

E. indifferent

4. Which is deliberate use?

A. checking headlines constantly

B. moving between articles

C. taking notes and revisiting difficult sections

D. collecting headlines

E. avoiding all devices

5. “Dictate the rhythm of attention” means:

A. control when and how attention shifts

B. improve handwriting

C. block information

D. slow reading

E. remove attention

6. Which inference is supported?

A. Information quantity alone does not ensure learning.

B. Online learning is always inferior.

C. Interruptions improve memory.

D. Technology has no educational value.

E. Only students have attention problems.

7. The author would agree that:

A. devices should be abandoned

B. digital tools are useful when intentional

C. headlines are better than articles

D. deep learning is impossible online

E. schools should ban technology

8. Which is NOT mentioned?

A. note-taking

B. comparing sources

C. revisiting difficult sections

D. reading long articles

E. memorising headlines

9. The passage contrasts:

A. students and teachers

B. books and technology

C. information access and depth of understanding

D. schools and homes

E. speed and memory

10. Best title:

A. The End of Digital Learning

B. Technology, Attention and Deliberate Use

C. Why Headlines Are Dangerous

D. Learning Without Information

E. The History of the Internet

Urban Trees

Urban trees provide more than decoration. They can give shade, reduce heat, intercept some rainwater, and create habitats. Their benefits depend on planning. Trees need sufficient root space, suitable species, adequate soil, and regular maintenance. Therefore, urban programmes should not simply maximize tree numbers. They should create healthy and sustainable environments that fit surrounding infrastructure.

11. The main point is:

A. trees are decorative

B. cities need planning, not merely more trees

C. trees should only be in parks

D. maintenance is unnecessary

E. trees have few benefits

12. Which benefit is NOT mentioned?

A. shade

B. rainwater interception

C. habitats

D. heat reduction

E. drinking water

13. Poor species selection may:

A. increase maintenance costs

B. remove wildlife

C. prevent rainfall

D. guarantee pavement damage

E. stop all growth

14. Tone:

A. analytical and practical

B. sarcastic

C. angry

D. humorous

E. celebratory

15. Increasing tree numbers without planning may:

A. create avoidable problems

B. always improve cities

C. eliminate maintenance

D. reduce biodiversity

E. solve infrastructure issues

16. “At any cost” suggests:

A. without considering consequences

B. for free

C. with government funding

D. during emergencies

E. after planning

17. What is specifically necessary?

A. adequate soil

B. expensive lighting

C. tall buildings

D. private ownership

E. tourist demand

18. The author distinguishes between:

A. birds and trees

B. parks and streets

C. quantity and sustainable planning

D. rain and heat

E. cities and villages

19. Which is supported?

A. Every species thrives anywhere.

B. Urban trees require context-sensitive planning.

C. Maintenance is unnecessary.

D. Trees have no practical benefits.

E. More trees solve every problem.

20. Best title:

A. Trees as Urban Infrastructure

B. The Problem with Birds

C. Why Cities Need More Roads

D. The Cost of Rain

E. Decorating Modern Streets

The Value of Failure

Failure is not automatically valuable, but unsuccessful attempts can provide information. A failed experiment may reveal an incorrect assumption, while an unsuccessful business idea may reveal weak market response. If mistakes are repeated without analysis, little is learned. Useful failure involves reflection, revision, and another attempt with better information. Failure becomes useful when reflection converts an unsuccessful result into knowledge.

21. The central argument is that failure:

A. is always better

B. is useful when examined

C. should always be avoided

D. guarantees success

E. has no link to knowledge

22. A failed experiment may:

A. reveal an incorrect assumption

B. guarantee funding

C. remove uncertainty

D. replace analysis

E. prove success

23. Repeated failure without analysis:

A. teaches little

B. guarantees resilience

C. is ideal

D. guarantees innovation

E. is better than success

24. Tone:

A. reflective and analytical

B. mocking

C. pessimistic

D. hostile

E. comic

25. “Resilient” refers to people who:

A. avoid challenges

B. recover and adapt after setbacks

C. never change

D. ignore mistakes

E. depend on luck

26. What converts failure into knowledge?

A. disappointment

B. repetition alone

C. reflection and revision

D. praise

E. speed

27. Which is NOT supported?

A. failure can provide information

B. analysis matters

C. every failure is automatically valuable

D. approaches can be revised

E. assumptions can be revealed

28. Success and failure can both be:

A. complete opposites

B. sources of information

C. equally disappointing

D. unrelated to learning

E. identical

29. “Better information” implies:

A. future attempts can use previous experience

B. information prevents all mistakes

C. failure should be hidden

D. only successful people have information

E. analysis is unnecessary

30. Best title:

A. Failure as a Source of Learning

B. Why Success Is Impossible

C. The Science of Luck

D. Avoiding Every Mistake

E. The End of Experimentation

Public Transport and Choice

Improving public transport is not simply a matter of adding buses or trains. Reliability, frequency, safety, convenience, and access to stations affect travel choices. An inexpensive but unpredictable system may be less attractive than a slightly more expensive dependable one. Affordability remains important, especially for lower-income commuters. Transport policy should therefore consider the overall passenger experience, including reliable service, connected routes, safe stations, and convenient ticketing.

31. Demand depends on:

A. capacity alone

B. the overall travel experience

C. price alone

D. stations only

E. advertising

32. Which is NOT listed?

A. reliability

B. safety

C. frequency

D. ticketing convenience

E. restaurant quality

33. Why may an inexpensive unpredictable system be less attractive?

A. Passengers value reliability too.

B. Passengers dislike low prices.

C. It has too many trains.

D. Safety is irrelevant.

E. It always has fewer routes.

34. Tone:

A. practical and balanced

B. sarcastic

C. emotional

D. dismissive

E. humorous

35. Affordability:

A. is irrelevant

B. remains important, especially for lower-income commuters

C. matters only to tourists

D. should be eliminated

E. always matters more than reliability

36. “Overall” emphasizes:

A. one feature

B. the combined travel experience

C. ticket prices only

D. number of buses

E. architecture

37. Suggested alongside capacity increases:

A. less safety

B. better ticketing convenience

C. fewer routes

D. unpredictability

E. lower frequency

38. The passage challenges the idea that:

A. transport matters

B. adding capacity alone is sufficient

C. safety matters

D. price matters

E. people choose transport

39. Reasonable inference:

A. attractiveness can improve without only expanding capacity

B. cost never matters

C. more buses always reduce demand

D. safety has no role

E. convenience is irrelevant

40. Best title:

A. Beyond Capacity: What Makes Public Transport Attractive

B. Why Buses Are Expensive

C. The History of Ticketing

D. Transport Without Passengers

E. The Problem with Stations

Reading and Memory

Exam reading requires identifying structure, distinguishing central claims from examples, and making supported inferences. Trying to memorize every sentence consumes time and may obscure the overall argument. A better approach is to build a mental map: understand the subject, note each paragraph’s role, and return to the passage when a question asks for a specific detail. This combines comprehension with selective retrieval and reduces the temptation to answer from general knowledge.

41. The passage recommends:

A. memorising every sentence

B. structured reading and selective retrieval

C. avoiding details

D. using general knowledge

E. reading only the first paragraph

42. A reader should identify:

A. only words

B. structure and central claims

C. author biography

D. every sentence

E. outside facts

43. Memorising every detail can:

A. guarantee errors

B. consume time and obscure the argument

C. make reading faster

D. eliminate inference

E. solve all questions

44. A “mental map” means:

A. a city map

B. understanding subject and paragraph roles

C. a word list

D. outside facts

E. an answer key

45. Return to the passage when:

A. every question is answered

B. a question requires a specific detail

C. you know nothing

D. the passage is short

E. the test ends

46. A legitimate inference must:

A. come from imagination

B. be reasonably supported by the passage

C. use outside knowledge

D. contradict the passage

E. be complicated

47. The passage warns against:

A. selective retrieval

B. structure

C. paragraph roles

D. answering from general knowledge

E. returning to text

48. Tone:

A. instructional and practical

B. angry

C. comic

D. uncertain

E. hostile

49. Selective retrieval means:

A. memorising everything

B. locating relevant information when needed

C. ignoring the passage

D. guessing

E. reading without purpose

50. Best title:

A. A Practical Method for Exam Reading

B. Why Memorization Always Wins

C. Reading Only for Pleasure

D. How to Avoid Reading

E. General Knowledge in Exams

Habit and Environment

Habits are often described as matters of willpower, but the surrounding environment can influence repeated behaviour. A phone beside a study book creates different cues from a phone kept elsewhere. Keeping healthy food visible can make it easier to choose. Making an undesirable activity inconvenient can reduce its frequency. Personal discipline remains relevant, but changing the environment can reduce the effort needed to act according to an intention. Habit change can therefore involve arranging surroundings so desired actions become easier and undesired actions require more deliberate effort.

51. Habits are influenced by:

A. willpower alone

B. environment and discipline

C. food prices only

D. technology only

E. luck

52. Environmental changes can:

A. make desired actions easier

B. remove discipline

C. guarantee success

D. eliminate habits instantly

E. prevent learning

53. The phone example illustrates:

A. cues

B. memory

C. income

D. weather

E. age

54. Personal discipline is:

A. irrelevant

B. relevant but not the only factor

C. harmful

D. impossible

E. the only solution

55. An undesirable activity may be reduced by:

A. making it convenient

B. requiring more deliberate effort

C. placing cues beside it

D. removing alternatives

E. ignoring surroundings

56. “Surrounding a person” means:

A. the context around them

B. their personality

C. their score

D. their history

E. their income

57. Which is NOT an example?

A. phone placement

B. food visibility

C. inconvenience

D. weather

E. healthy food

58. Habit change can involve:

A. designing surroundings intentionally

B. avoiding all decisions

C. only motivation

D. ignoring cues

E. eliminating routines

59. Tone:

A. practical and explanatory

B. sarcastic

C. hostile

D. dramatic

E. dismissive

60. Best title:

A. Designing the Environment for Better Habits

B. Why Discipline Is Useless

C. The History of Phones

D. Food and Motivation

E. Habits Without Choices

Scientific Communication

Scientific knowledge becomes more useful when findings are communicated clearly. Technical precision is necessary, but precision does not require unnecessary complexity. A researcher can explain a result in language suited to the audience without changing the evidence. Problems arise when communication exaggerates certainty or hides limitations. Responsible explanation distinguishes what evidence shows from what remains uncertain. Clear scientific communication therefore preserves accuracy while making reasoning accessible.

61. Scientific communication should be:

A. complex

B. accurate and accessible

C. simplified regardless of evidence

D. certain only

E. free of limitations

62. Precision does NOT require:

A. accuracy

B. appropriate language

C. unnecessary complexity

D. evidence

E. clear reasoning

63. Limitations should be communicated to:

A. preserve responsible interpretation

B. make research impossible

C. increase certainty

D. hide evidence

E. avoid audiences

64. The author criticizes communication that:

A. explains clearly

B. matches audience

C. exaggerates certainty

D. preserves evidence

E. shows uncertainty

65. “Underlying evidence” means:

A. evidence supporting the result

B. salary

C. audience opinion

D. paper title

E. unrelated facts

66. What must be preserved?

A. accuracy

B. complexity

C. uncertainty only

D. jargon

E. length

67. Simplification is acceptable when it:

A. changes evidence

B. preserves accuracy

C. removes limitations

D. adds certainty

E. hides reasoning

68. Tone:

A. analytical and responsible

B. comic

C. angry

D. dismissive

E. fearful

69. Which is supported?

A. Clear communication can improve understanding without changing evidence.

B. Complex language is always more accurate.

C. Uncertainty should be hidden.

D. Researchers should avoid public communication.

E. Communication is only vocabulary simplification.

70. Best title:

A. Accuracy and Accessibility in Scientific Communication

B. Why Science Must Be Complicated

C. Removing Uncertainty from Research

D. The End of Scientific Evidence

E. Vocabulary in Science

The Economics of Repair

Repair can appear less attractive than replacement when new products are inexpensive. Yet the decision involves more than immediate price. Repair may extend product life, reduce waste, and preserve useful components. Replacement may provide newer features but requires resources to manufacture and distribute another product. Policies that improve access to spare parts, repair information, and skilled technicians can make repair more practical. The goal is not to make replacement impossible, but to ensure repair remains a realistic option.

71. The passage mainly argues that repair:

A. should always replace purchases

B. has wider benefits and should remain practical

C. is always cheaper

D. is impossible

E. has no environmental effect

72. Replacement may appear attractive because:

A. new products can be inexpensive

B. repair is always instant

C. new products create no waste

D. replacement needs no resources

E. consumers dislike features

73. A repair benefit is:

A. reducing waste

B. guaranteeing new features

C. eliminating manufacturing

D. requiring no skills

E. always costing less

74. Policies can support repair through:

A. spare parts and repair information

B. luxury goods

C. advertising

D. new features only

E. import taxes

75. Tone:

A. balanced and policy-oriented

B. angry

C. humorous

D. pessimistic

E. sarcastic

76. Consumer decisions involve:

A. immediate price only

B. a wider system of costs and benefits

C. appearance only

D. features only

E. no trade-offs

77. The goal is NOT to:

A. make repair practical

B. support access to parts

C. make replacement impossible

D. provide information

E. preserve choice

78. “Balance” refers to:

A. weighing costs and benefits

B. physical balance

C. product weight

D. accounting only

E. repair speed

79. Reasonable inference:

A. making repair easier may influence choices

B. consumers never consider cost

C. repair has no value

D. replacement uses no resources

E. policy cannot affect repair

80. Best title:

A. Keeping Repair a Realistic Choice

B. Why New Products Are Always Better

C. The End of Manufacturing

D. Repair Without Consumers

E. The Cost of Spare Parts

Competition and Cooperation

Competition can encourage improvement, but it is not always sufficient to solve shared problems. When success depends on a common resource, cooperation may be necessary. Organizations may compete for customers while agreeing on standards that make an industry safer. Cooperation does not eliminate competition; both can exist simultaneously. Effective systems depend on recognizing which goals should be pursued competitively and which require coordination.

81. Central idea:

A. competition and cooperation cannot coexist

B. shared problems may require cooperation even in competitive settings

C. competition is always harmful

D. cooperation eliminates performance

E. standards reduce competition

82. Organizations may cooperate to:

A. establish shared standards or solve common problems

B. eliminate customers

C. stop innovation

D. avoid all competition

E. reduce safety

83. Cooperation can:

A. eliminate competition

B. coexist with competition

C. always be superior

D. be unnecessary

E. work only between governments

84. Organizations compete for:

A. customers

B. employees only

C. land

D. licenses

E. food

85. Coordination may be needed for:

A. shared goals or common problems

B. private preferences

C. hobbies

D. advertising styles

E. personal schedules

86. Tone:

A. balanced and analytical

B. hostile

C. humorous

D. emotional

E. dismissive

87. Which is NOT supported?

A. competition can encourage improvement

B. cooperation can be necessary

C. both can coexist

D. every problem is solved by competition

E. shared standards can help

88. “Simultaneously” means:

A. at the same time

B. eventually

C. rarely

D. previously

E. separately

89. The author would agree that:

A. different goals may require different forms of interaction

B. competition should always be removed

C. cooperation prevents improvement

D. organizations cannot share standards

E. all problems are individual

90. Best title:

A. When Competition Needs Cooperation

B. Why Competition Always Fails

C. The End of Industry

D. Cooperation Without Competition

E. Customers and Advertising

Museums and Interpretation

A museum does more than preserve objects; it also decides how objects are presented. Labels, exhibit arrangement, and accompanying stories can influence what visitors notice and how they understand an object. This does not mean museums simply invent meanings. Historical evidence limits reasonable interpretation. Still, different contexts can highlight different aspects of significance. Good interpretation combines evidence with thoughtful presentation, helping visitors understand complexity without pretending every historical question has one simple answer.

91. The main idea is that museums:

A. only store objects

B. shape understanding through evidence-based presentation

C. invent all meanings

D. avoid interpretation

E. provide only entertainment

92. What can influence what visitors notice?

A. labels and exhibit arrangement

B. ticket prices only

C. building height

D. weather

E. parking

93. Historical evidence:

A. limits reasonable interpretation

B. has no value

C. is invented

D. always gives one simple answer

E. prevents presentation

94. Different contexts can:

A. highlight different aspects of significance

B. change objects

C. remove evidence

D. guarantee agreement

E. eliminate history

95. Tone:

A. nuanced and explanatory

B. sarcastic

C. angry

D. dismissive

E. humorous

96. Good interpretation combines:

A. evidence with thoughtful presentation

B. entertainment with advertising

C. fiction with certainty

D. objects with no labels

E. stories with no evidence

97. “One simple answer” implies:

A. historical questions can be complex

B. history has no evidence

C. museums always disagree

D. visitors cannot learn

E. objects have no meaning

98. Which is NOT mentioned?

A. labels

B. arrangement

C. stories

D. café prices

E. context

99. Interpretation should:

A. respect evidence while explaining complexity

B. ignore history

C. avoid context

D. present one viewpoint only

E. invent meanings

100. Best title:

A. How Museums Shape Historical Understanding

B. Why Museums Should Remove Labels

C. Objects Without Meaning

D. The Business of Tickets

E. History Without Evidence

ANSWER KEY & HINGLISH EXPLANATIONS

The test is fully English. Explanations are in Hinglish for revision.

1. C — deliberate technology use matters more than access alone

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

2. B — superficial processing

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

3. C — balanced

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

4. C — taking notes and revisiting difficult sections

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

5. A — control when and how attention shifts

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

6. A — Information quantity alone does not ensure learning.

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

7. B — digital tools are useful when intentional

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

8. E — memorising headlines

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

9. C — information access and depth of understanding

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

10. B — Technology, Attention and Deliberate Use

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

11. B — cities need planning, not merely more trees

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

12. E — drinking water

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

13. A — increase maintenance costs

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

14. A — analytical and practical

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

15. A — create avoidable problems

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

16. A — without considering consequences

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

17. A — adequate soil

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

18. C — quantity and sustainable planning

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

19. B — Urban trees require context-sensitive planning.

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

20. A — Trees as Urban Infrastructure

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

21. B — is useful when examined

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

22. A — reveal an incorrect assumption

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

23. A — teaches little

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

24. A — reflective and analytical

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

25. B — recover and adapt after setbacks

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

26. C — reflection and revision

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

27. C — every failure is automatically valuable

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

28. B — sources of information

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

29. A — future attempts can use previous experience

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

30. A — Failure as a Source of Learning

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

31. B — the overall travel experience

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

32. E — restaurant quality

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

33. A — Passengers value reliability too.

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

34. A — practical and balanced

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

35. B — remains important, especially for lower-income commuters

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

36. B — the combined travel experience

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

37. B — better ticketing convenience

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

38. B — adding capacity alone is sufficient

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

39. A — attractiveness can improve without only expanding capacity

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

40. A — Beyond Capacity: What Makes Public Transport Attractive

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

41. B — structured reading and selective retrieval

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

42. B — structure and central claims

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

43. B — consume time and obscure the argument

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

44. B — understanding subject and paragraph roles

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

45. B — a question requires a specific detail

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

46. B — be reasonably supported by the passage

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

47. D — answering from general knowledge

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

48. A — instructional and practical

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

49. B — locating relevant information when needed

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

50. A — A Practical Method for Exam Reading

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

51. B — environment and discipline

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

52. A — make desired actions easier

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

53. A — cues

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

54. B — relevant but not the only factor

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

55. B — requiring more deliberate effort

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

56. A — the context around them

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

57. D — weather

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

58. A — designing surroundings intentionally

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

59. A — practical and explanatory

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

60. A — Designing the Environment for Better Habits

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

61. B — accurate and accessible

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

62. C — unnecessary complexity

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

63. A — preserve responsible interpretation

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

64. C — exaggerates certainty

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

65. A — evidence supporting the result

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

66. A — accuracy

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

67. B — preserves accuracy

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

68. A — analytical and responsible

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

69. A — Clear communication can improve understanding without changing evidence.

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

70. A — Accuracy and Accessibility in Scientific Communication

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

71. B — has wider benefits and should remain practical

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

72. A — new products can be inexpensive

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

73. A — reducing waste

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

74. A — spare parts and repair information

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

75. A — balanced and policy-oriented

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

76. B — a wider system of costs and benefits

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

77. C — make replacement impossible

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

78. A — weighing costs and benefits

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

79. A — making repair easier may influence choices

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

80. A — Keeping Repair a Realistic Choice

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

81. B — shared problems may require cooperation even in competitive settings

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

82. A — establish shared standards or solve common problems

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

83. B — coexist with competition

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

84. A — customers

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

85. A — shared goals or common problems

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

86. A — balanced and analytical

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

87. D — every problem is solved by competition

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

88. A — at the same time

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

89. A — different goals may require different forms of interaction

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

90. A — When Competition Needs Cooperation

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

91. B — shape understanding through evidence-based presentation

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

92. A — labels and exhibit arrangement

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

93. A — limits reasonable interpretation

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

94. A — highlight different aspects of significance

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

95. A — nuanced and explanatory

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

96. A — evidence with thoughtful presentation

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

97. A — historical questions can be complex

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

98. D — café prices

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

99. A — respect evidence while explaining complexity

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

100. A — How Museums Shape Historical Understanding

Hinglish: Yeh option passage ke stated point ya clearly supported inference ko match karta hai. Baaki options passage se unsupported, incomplete, ya over-generalized hain.

SCORE & ERROR ANALYSIS

Score: _____ / 100

85–100: Strong • 70–84: Good foundation • 55–69: Needs targeted revision • Below 55: Rebuild RC fundamentals before the next full mock.

5-Line Progress Check

1. Passage with most mistakes: _____
2. Question type I struggled with: _____
3. Main mistake pattern: _____
4. My timing issue: _____
5. One action before the next mock: _____
